Bootstrap shop item template

Launch BootstrapA simple, unstyled, shop item page template featuring star rating and a product review section Shop Item is a basic, unstyled ecommerce template for Bootstrap e-commerce websites. This template can be used to display a single store item within an online store. Features Sidebar navigation list for shop categories Product item cards with great header image, product information, and reviews Comments and reviews section Like our free products? Our pro products are even better! Shop Item SB UI Kit ProLanding Page Options135+DocumentationEmail SupportCustom UtilitiesExpanded Color System [{ id: 1, category: jeans, name: Ripped jeans, image: size: XL, color: blue, price: 20.99 }, { id: 2, category: jeans, name: Boyfriend jeans, image: size: S, color: blue, price: 24.99 }, { id: 3, category: shirts, name: Ripped sweatshirt, image: size: XL, color: white, price: 29.99 }, { id: 4, category: jackets, name: Denim Jacket, image: size: M, color: grey, price: 40.99 }, { id: 5, category: shirts, name: Longsleeve, image: , size: L, color: black, price: 120.99 }] NEW: Food Delivery Service Demo NEW: Single Post no Sidebar Template UPDATED: Bootstrap to latest stable version 4.5.0 UPDATED: All plugins, npm modules and dependencies TO latest versions UPDATED: Changed CSS class name on transparent navigation bar from hubbar-transparent to hubbar-floating. Updated stickyNavbar() function inside theme.js UPDATED: ajaxifySubscribeForm() inside theme.js. Wrote about code from jQuery to vanilla JavaScript UPDATED: Redesigned structure of MOPS templates dependencies: Moved hubs and footer partial from layout.pug to page templates. Now mallard sleevevorks via block keywords. These changes made the compilation process 1.5x faster when you change something in the navbar or footer partial. Plus now you have more flexibility to adjust navigation bars and footers for individual pages. UPDATED: package.json and gulpfile.js files. Now all 3rd party plugins and libraries are installed via npm automatically when you run NPN Install command (previously manually) and moved from node_modules to dist folder of Gulp on project init. Learn more about how to add new vendor plugins to the project in this article UPDATED: Getting started and documentation components: Fixed components code examples. Updated section: Navbar/Page title/Footer variants (Pug). Added section: Install Vendor plugins with npm and Gulp UPDATED: Sketch file: added new Food Delivery Service demo frontpage mockup Minor bug fixes and improvements v1.3 – February 29, 2020 NEW: Grocery Store Demo NEW: Single Product/Brand Store. Show demo NEW: Navbar with Sidebar. See live examples of grocery store demo page NEW: Transparent Navbar version. See live examples of Single Product/Brand Store Demo page NEW: Javascript behavior when radio buttons behave like tabs by switching linked content. See live examples of the Single Product/Brand Demo page (Choose your style section) NEW: Added empty state for Cart dropdown. See live examples of Single Product/Brand Demo page UPDATED: Replaced Salvatore.js with Shuffle.js and ImagesLoaded.js for masonry grid (especially Blog grid) layouts UPDATED: Color presets (radio buttons) now change labels dynamically via Javascript. See it in action on Shop Single Product pages v1 and v2 UPDATED: Added new icons to cartzilla icon font UPDATED: Sketch file with new demo page design mockups UPDATED: Security patch: La rel = 'noopener' to all links with target = '_blank' attributes. For more info read this article UPDATED: Node modules to latest versions FAST: Handheld Toolbar styles: Remove padding bottom that equals Toolbar height from body by default. Now you can add bottom padding to your body by applyoing CSS class toolbar-enabled to the body. If you use MOPS it applies automatically if where isToolbar = true is added to some page template or globally enabled via templates / helpers / config.pug. It is made to ensure that you can remove bottom padding from your body without editing core themed styles unless you need Handheld Toolbar. FAST: SCSS maps in theme _variable.scss. Special thanks to Kevin Ramharak for the fix proposal FIXED: Minor bug fixes and improvements v1.2 – December 20, 2019 NEW: Added new toolbar for handheld devices that are stuck to the bottom (similar to iOS) and hold all important buttons like Menu, Shopping Cart, Wish List, Sidebar togglers, etc. This will improve the user experience on handheld devices. NEW: Added .gitignore file to the download package that tells git which files (or patterns) it should ignore. Be sure to enable hidden files visibility on your system. UPDATED: Navigation bars (Headings): added tooltips for action buttons. Added separate wish list button for cases where wishlist is available not only to registered users. UPDATED: 404 Wrong page templates UPDATED: JavaScript plugins to latest versions UPDATED: Node modules to latest versions FAST: Documentation typos and wrong content FIXED: Minor bug fixes and improvements v1.1 – November 30, 2019 NY: Digital Products Marketplace Demo NEW: Marketplace Vendor/User Dashboard NY: Electronics Store Website. View demo NEW: Simple product page v2. Show demo NEW: Product comparison page (table). View demo NEW: Navbar Versions for: Marketplace and Electronics Store NEW: Footer Version for: NEW: Quick View Popup v2 (for Electronics Store) NEW: 404 Error Page Template (Text variant). Show demo NEW: Diagram Component. View demo NEW: Countdown Timer Component. Component. demo NEW: Product Card for Digital (Downloadable) Products NEW: Drag & Drop File Uploader. See updated Form component page for more details UPDATED: Bootstrap to latest version 4.4.1 UPDATED: Home page Hero Slider. Added animations to Slider Text layers UPDATED: Icon font. Added new Icons to the UPDATED collection: _variables.scss Added \$path-to-fonts variable. Now it's easier to change theme fonts via _user-variables.scss UPDATED: Sketch file. Added new page mockups UPDATED: Documentation and components FIXED: Minor bug fixes and improvements v1.0 – October 21, 2019 Tags: bootstrap, Furniture template, Shopping template, bootstrap 4, boxed layout, email templates, email templates, modem all, grocery, html template, html template, html5, multi-product card, responsive, rtl, sassSee all tags by themes encoder in ShoppingBased on Bootstrap 4 and HTML5Easy To Customize Website Colors With SassW3C Valid Code with Responsive TemplateTags : bootstrap, Möbelmall, Shoppingmall, bootstrap 4 , boxed layout, e-commerce, email templates, modem all, grocery template, html template, html5, multi product card, responsive, rtl, sassPreviewTags: Electronics store, e-commerce store, e-commerce, e-commerce, e-commerce, e-commerce clean bootstrap 4 template, fashion and clothing store, furniture store, minimal, modern, multipurpose retail e-commerce, online shop, online store, responsive, retail, shoppingSee all tags6 Multipurpose eCommerce html template & RTLBootstrap 4 , SEO optimized & Mobil ReadyFashion Shop, Electronics & furniture storesTagter: Electronics store, e-commerce store, ecommerce, ecommerce rentrap , fashion and clothing store, furniture store, minimal, modern, multipurpose retail e-commerce, online shop, online store, responsive, retail, shoppingpreviews: shopping, clean, clothing, creative, ecommerce, electronics, fashion, furniture, market, modern, psd, retail, shopping, shop, store, uniqueSee all tags: shop, clean, clothing, creative, e-commerce, electronics, fashion, furniture, market, modern, psd, retail, shopping, shop, uniqueAdd tags Cart: shop, agriculture, farm, food, blog, fruit, healthy food, healthy lifestyle , market, organic food, organic market, organic store, responsive, vegetables, veggy
